The book guides coaches and athletes, from elementary school through college, in analyzing games while thinking deeply about motivation, goal setting, and ramping up the day through. As Mark grows from a disabled child, bullied by his peers, to an emotionally disturbed and defiant adolescent, and finally into a young man in trouble with the law, Cornine learns that even the best intentions are not enough. Based on true events, Maze Craver is a riveting and emotional journey through the shadowy bureaucratic underground of the American foster care system, educational, health and mental justice and criminal systems. Told from the perspective of a mother who will do anything to help her son, Maze Cornine reveals the secrets of a system designed to fail those who need help the most.

Value Crisis The Happy Family through Family Communion

Sorokin, Jepht Jephte Jepsen 2014 The book "Value Crisis" analyses how a lack of basic moral education starting in the family, with adequate parental responsibility, has led to a world where violence and social evils affect peace and harmony. The family as a cell of socialization, education and socialization, has become a subject of study in modern society. In this context, the book "Value Crisis: The Happy Family through Family Communion" addresses the issue of how to educate children in values that will enable them to live a life of harmony and peace. The book covers various aspects of the subject, including the importance of a happy and harmonious family, the role of parents in the upbringing of children, and the need for a values-based education system. The book provides practical guidance and advice on how parents can help their children develop strong moral values and build a happy and healthy family life. The book also includes case studies and real-life examples to illustrate the concepts discussed in the text.
